

## PRESS RELEASE

FOR IMMEDIATE RELEASE

### **NEW! Custom-Covered Portable XRF Analyzers**

Woburn, Mass., March 12, 2006 – Innov-X Systems, Inc. announces the introduction of the first **Custom-Covered Portable XRF Analyzers** available at the Pittsburgh Conference in Orlando, FL, from March 13-16, 2006. Although designed for fun-in-the-field, these custom-covered Innov-X Systems Analyzers house the top-of-the-line multi-element tube-based XRF analyzers you've come to expect. Innov-X set XRF technology free to live outside the box – **Imagine the Possibilities.** With thousands of Innov-X Portable XRF Analyzers in the field, their worldwide offices offer local installation and training. Stop by Booth 1407 at the Pittsburgh Conference to see the latest fun-in-the-field innovations from Innov-X Systems.

#### **About Innov-X Systems**

Innov-X Systems was founded in early 2001 to revitalize the XRF industry with a pioneering approach to portable analyzers. When Innov-X delivered the world's first x-ray tube-based portable XRF, a new era in portable XRF began. ***Innov-X set XRF technology free to live outside the box!***

With R&D and manufacturing facilities at their new 22,000 ft<sup>2</sup> U.S. headquarters in Woburn, MA just north of Boston, Innov-X has full-service offices in Europe (Netherlands) and Asia (Hong Kong). They also maintain sales management, marketing and service alliances in the Middle East (Saudi Arabia) and South America (Sao Paulo). Innov-X is a privately held, profitable and growing firm with exceptional customer service.

More company and new product information is available at [www.innovxsys.com](http://www.innovxsys.com).
