

## PRESS RELEASE

FOR IMMEDIATE RELEASE

### **Innov-X Systems is expanding . . . again!**

Woburn, Mass., March 12, 2006 – Innov-X Systems, Inc. announces its **corporate headquarters move into a new facility with twice the space** of their current headquarters on March 20, 2006. With thousands of Innov-X Systems Portable XRF Analyzers already in the field, this rapidly growing company needs more space to keep up with the ever-increasing business of their core Portable XRF Analyzers and their **ever-expanding new product offerings**, new OEM arrangements and new business ventures. Watch their website for information on the Open House at their new Worldwide Headquarters Facility.

#### **About Innov-X Systems**

Innov-X Systems was founded in early 2001 to revitalize the XRF industry with a pioneering approach to portable analyzers. When Innov-X delivered the world's first x-ray tube-based portable XRF, a new era in portable XRF began. ***Innov-X set XRF technology free to live outside the box!***

With R&D and manufacturing facilities at their new 22,000 ft<sup>2</sup> U.S. headquarters in Woburn, MA just north of Boston, Innov-X has full-service offices in Europe (Netherlands) and Asia (Hong Kong). They also maintain sales management, marketing and service alliances in the Middle East (Saudi Arabia) and South America (Sao Paulo). Innov-X is a privately held, profitable and growing firm with exceptional customer service.

More company and new product information is available at [www.innovxsys.com](http://www.innovxsys.com).
