FOR IMMEDIATE RELEASE

NEW! Automated On-Line XRF Analyzer for Continuous 24/7 Operation

Woburn, Mass., March 12, 2006 – Innov-X Systems, Inc. announces the introduction of its **Automated On-Line XRF Analyzer for Continuous 24/7 Operation** at the Pittsburgh Conference in Orlando, FL, from March 13-16, 2006. The Innov-X Systems **Process, On-line Analyzer** features a small XRF probe that mates the electronics package and a Pocket PC, standard Windows PC, or both systems simultaneously. It was **designed for easy integration** into virtually any process monitoring and process control system to verify alloy grade and chemistry. With thousands of Innov-X Systems Portable XRF Analyzers in the field, their worldwide offices offer local installation and training. Stop by Booth 1407 at the Pittsburgh Conference to see the latest innovations from Innov-X Systems.

About Innov-X Systems

Innov-X Systems was founded in early 2001 to revitalize the XRF industry with a pioneering approach to portable analyzers. When Innov-X delivered the world's first x-ray tube-based portable XRF, a new era in portable XRF began. ***Innov-X set XRF technology free to live outside the box!***

With R&D and manufacturing facilities at their new 22,000 ft² U.S. headquarters in Woburn, MA just north of Boston, Innov-X has full-service offices in Europe (Netherlands) and Asia (Hong Kong). They also maintain sales management, marketing and service alliances in the Middle East (Saudi Arabia) and South America (Sao Paulo). Innov-X is a privately held, profitable and growing firm with exceptional customer service.
