

## PRESS RELEASE

FOR IMMEDIATE RELEASE

### **Discover a Powerful, Real-World Solution towards RoHS Compliance: Innov-X Handheld XRF Screening Video Demo Online**

**Woburn, MA---**Innov-X Systems is pleased to announce the release of an online video demo created specifically to help companies learn about handheld XRF RoHS compliance screening solutions. Portable, handheld EDXRF is a recommended method for non-destructive, low-cost, fast, resourceful and efficient screening for RoHS compliance. With the Innov-X Systems Handheld XRF Analyzer, companies can virtually eliminate compliance risk by confirming supplier C and C's (Certificate of Conformity). Innov-X's field proven screening methods can help to make any lab testing surgically precise.

The Innov-X Systems' online video demo allows viewers to have immediate access to a demonstration of the handheld XRF unit without leaving their desk, while at the same time providing a wealth of information about the Innov-X Analyzer capabilities and specialized RoHS-Star™ software.

"This video is just one part of our commitment to helping electronic component suppliers, OEMs and contract manufacturers mitigate the impact of RoHS. With immediate access and 24/7 availability of this online demo video, Innov-X is dedicated to providing the best support worldwide." Don Sackett, CEO Innov-X Systems.

For due diligence trust, but verify. For an informative, easy to follow demo online please click here: <http://www.innov-x-sys.com/interior//products/demo>

#### **About Innov-X Systems**

Innov-X Systems is a vital new force in the x-ray fluorescence (XRF) industry. Their systems perform fast, accurate chemical analysis in seconds to identify, differentiate and quantify most materials by elemental composition. Founded in 2001, they pioneered handheld XRF instrumentation using a miniature x-ray tube rather than radioactive isotopes.

With R&D and manufacturing facilities in the U.S., Innov-X has offices in Europe (the Netherlands), and Asia (Hong Kong). They maintain sales and service alliances in Canada, the Middle East, Latin America and worldwide. Service, installation and training is available in over 100 countries.

More company information is available at <http://www.innov-xsys.com>.
